

PLAYER'S POSITIONS:

1. The serving regu's (team's) Forwards must remain in their 'quarter circles', while the back player, the Tekong (Server), must have only one foot in the 'serving circle', until the ball is contacted by his/her foot.
2. The receiving regu's players may stand anywhere on their side of the court, but usually the Tekong stands just in front of the serving circle with the Forwards on either side of him/her.
3. Players are allowed to move freely on their sides of the court once the ball has been served.

TO BEGIN PLAY:

The game begins by one of the Forwards tossing the takraw ball back to the Tekong. The Tekong must then kick the ball, with the foot that is outside the serving circle, into the opponent's court in one try (usually with an extended version of the Inside Kick). The serve is still good if the ball hits the net as it goes into the other opponent's side of the court.

SCORING:

1. A point is awarded on every rally ... to the regu that did not fault.
2. A fault by the regu possessing the ball also constitutes a 'loss of serve'.
3. A set is won by scoring 21 points, but must win by 2 points, up to 25.
4. A match is won by winning two out of three sets.
5. A 'tie break' set only goes to 15 points, but must win by 2, up to 17.

FAULTS:

1. The Tekong does not kick the ball over the net from the service toss.
2. The ball falls to the ground inside or outside of the court.
3. The ball is hit more than three times in succession by one side.
4. The ball hits the net but does not go over it.
5. The ball hits the hand or arm of a player.
6. Any part of the body touches, crosses the plane or goes under the net.
7. The ball is stalled (stops) on a player's body instead of bouncing off.

Note: One player may hit the ball two or three times consecutively.
The ball may be hit up to 10 feet outside court's perimeter.

FIRST BALL: When receiving a serve, stay low and deflect the oncoming ball upwards (head and thigh shots are highly effective for this purpose).

SETTING: Setting is a skill which is executed by propelling the ball high above the net to enable the same, or another, player to smash the ball into the opponent's court. Usually a Forward with the best ball control is Setter.

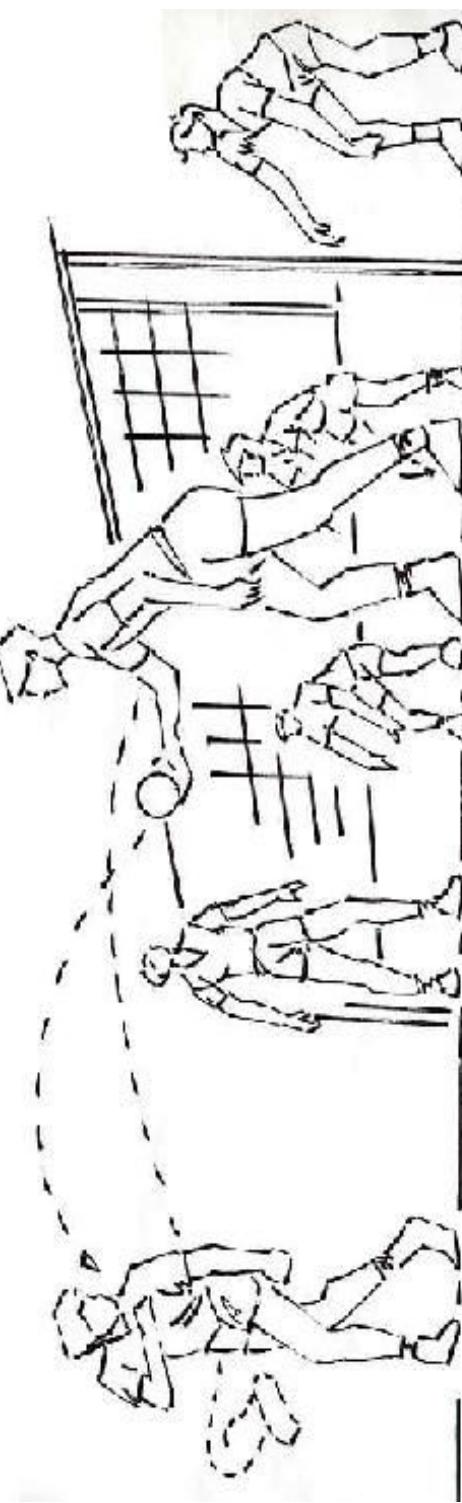

SPIKING: After the ball has been set, it can be spiked down into the opponent's court by a Spiker's head or foot. This is the most effective and dramatic move in the sport. Usually one of the Forward players is designated the "Primary Spiker" to limit confusion. The other Forward (Primary Setter) still spikes when the "Primary Spiker" can't get to the ball.

BLOCKING: A block is a defensive skill used mainly for the purpose of preventing a spiked ball, that is coming from above and close to the net, from being drilled into the defending side. A block is usually made by jumping and raising the side of one's foot and leg above the net, or by turning and jumping up with the back to the net ... never face the net.

STRATEGIES:

Sepak Takraw is a fast-paced, action-packed sport played by two opposing regus with three players on each side. Each regu is permitted to hit the takraw ball three times before it must cross the net again, similar to volleyball but without using hands or arms. Another major difference is that the same player may hit the ball all three times if he or she chooses.

The strategies in Sepak Takraw are very similar to those in volleyball, but using only the body parts that are allowed in soccer. The receiving team will attempt to play the takraw ball towards the front of the net, usually having all 3 players involved in making the best use of their 3 hits to pass, set and spike the ball - all without the use of hands or arms, so it's like soccer-volleyball!!
